Product Specification Sheet

Product Name	Stemgent® TRA-1-60 Antibody (Purified), Mouse anti-Human
Description	The TRA-1-60 monoclonal antibody reacts with a pluripotent-stem-cell-specific antigen expressed on undifferentiated human embryonic stem (ES) cells, embryonal carcinoma (EC) cells, and embryonic germ (EG) cells. The expression of TRA-1-60 on human ES cells is down-regulated upon differentiation. The TRA-1-60 antibody recognizes a neuraminidase-resistant carbohydrate epitope expressed on podocalyxin, a member of the CD34-related family of sialomucins. Podocalyxin is a transmembrane glycoprotein, which has been implicated in the development of aggressiveness in a variety of cancers, including breast and prostate cancer.
Catalog Number	09-0010
Size	100 µl
Concentration	0.5 mg/ml
Clone	TRA-1-60
Isotype	Mouse IgM
Immunogen	Human embryonal carcinoma cell line 2102Ep
Reactivity	Human
Preparation	This antibody was purified by affinity chromatography.
Formulation	Phosphate-buffered solution, pH 7.2, and 0.09% sodium azide
Storage and Stability	Store at 4°C protected from light. Do not freeze. Stable for 6 months from date of receipt when stored as directed.
Quality Control	Tested by immunocytochemistry (**Figure 1**) and flow cytometry (**Figure 2**) to ensure product quality.
Recommended Usage	The suggested use of this antibody is a 1:100 dilution for immunocytochemistry and 0.25 µg per 1 x 10^6 viable cells in 100 µl for flow cytometry. For application specific protocols, please reference *Protocol: Immunocytochemistry* and *Protocol: Flow Cytometry* online at www.stemgent.com/support /protocols.
