### 1 Identification

· **Product identifier**

· **Trade name:** NutriFreez™ D10 Cryopreservation Medium

· **Article number:** 05-713-1

· **Application of the substance / the mixture**

NutriFreez™ D10 Cryopreservation Medium maintains animal component-free (ACF) conditions during cryopreservation when culturing cells in a xeno-free or ACF environment. Superior results were obtained in comparison with both serum-containing freezing media as well as competing serum-free products.

NutriFreez™ D10 Cryopreserving Medium contains methylcellulose and DMSO in place of serum. The culture of cells in animal component-free medium eliminates the risks associated with animal sera and serum-derived products.

Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation
- **Material of gloves**  
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
- **Penetration time of glove material**  
The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.
